

### Assumption:

The proposed system is a university website for marketing purpose. Some assumptions had to be made in order to develop the system. The system may not have many complex computing processes because of the purpose of the system. roles are an important fact for this system, three types of user or role may find the system more useful such as, visitor, student and alumni. An admin will maintain the website and keep it up to date with information. The system might be visited by both domestic or international users, so while developing it's essential to keep it in mind to have both native and international language access can be granted to the users. The system should be interactive so due to the fact; it is a marketing purposed system.
